

Dear Sir,
Greeting from Business Octane!

Enough is Enough - Why let your senior management struggle with basic requirements in their Video Conferences?

During covid you have implemented MS teams and/ or zoom and/ or Google meet for video meetings. But whatever Crestron/Poly/ Logitech/Lenovo cloud VC solutions you have implemented in your conference rooms, your senior management still keeps on struggling in these video meetings on account of :

#1 the camera does not focus automatically, instantly and reliably - on them when they speak, Consequently, they are shown very small to the remote participants.

#2 Insufficient clarity & Intelligibility in the audio that they send or receive - specially in medium and large conference rooms. Consequently, multiple communication gaps develop and it wastes their precious time.

*Business Octane launches **Altra (CLARITY +TRACK) 1000** that now kills two birds with one stone. It will get seamlessly integrated with any of your VC Systems. Now for the first time solve both the above mentioned senior management problems in your 7 to 18 PAX rooms in a way that you have to see a demonstration to believe that something like this is possible.

For large rooms higher models are available like Altra (CLARITY +TRACK) 2000 which provides the same revolutionary audio and speaker track experience in large rooms up to 36 pax.

Seeing is believing!

Hearing is believing!

Trusted by more than 1000 customers

Thanks & Regards,

Sanjay Bansal
Chairman & Managing Director
